

IN THE CLAIMS

Claim 1 (currently amended). A cosmetic or dermatological preparation, which is a finely disperse water-in-oil system, comprising

1. an oil phase,
2. a water phase,
3. one or more modified phyllosilicates, which exhibits both hydrophilic and lipophilic properties and positions itself at the water/oil interface, wherein the content of said one or more modified phyllosilicates is between 0.05% by weight and 20% by weight based on the total weight of the preparation,
4. one or more flavones, flavanones and/or flavonoids, wherein the content of said one or more flavones, flavanones and/or flavonoids is from 0.01 to 5.0% by weight, based on the total weight of the preparation, and
5. at most 0.5% by weight of one or more emulsifiers.

Claim 2 (previously presented). The preparation of claim 1, which is emulsifier-free.

Claim 3 (currently amended). The preparation of claim 1, wherein ~~the~~ further cosmetic or pharmaceutical auxiliaries, additives and/or active ingredients are present.

Claim 4 (canceled).

Claim 5 (canceled).

Claim 6 (canceled)

Claim 7 (previously presented). The preparation of claim 1 comprising one or more additives or active ingredients selected from the group consisting of antioxidants and UV filter substances.

Claim 8 (currently amended). The preparation of claim 1, wherein in addition to one or more modified phyllosilicates, further pigments are present wherein said further pigments are selected from the group consisting of boron nitride, modified polysaccharides, microfine polymer particles, micronized inorganic pigments and mixtures thereof.

Claim 9 (previously presented). The preparation of claim 8, wherein said micronized inorganic pigments are amphiphilic metal oxides.

Claim 10 (previously presented). The preparation of claim 9, wherein said amphiphilic metal oxides are selected from the group consisting of titanium dioxide, zinc oxide, iron oxides, iron mixed oxides, silicon dioxide, silicates and mixtures thereof.

Claim 11 (currently amended). The preparation of claim 1, wherein the content of one or more modified phyllosilicates is between 0.1% and 5% by weight based on the total weight of the preparation.

Claim 12 (currently amended). The preparation as in claim 1, wherein the content of one or more flavones, flavanones and/or flavonoids is from 0.1 to 2.0% by weight, based on the total weight of the preparation

Claim 13 (currently amended). The preparation of claim 1, wherein the one or more flavones, flavanones and/or flavonoids is a flavone glycoside selected from the group consisting of α -glucosylrutin, α -glucosylmyricitrin, α -glucosylisoquercitin and α -glucosylquercitin.

Claim 14 (previously presented). The preparation of claim 13, wherein the flavone glycoside is α -glucosylrutin.

Claim 15 (canceled).

Claim 16 (canceled).

Claim 17 (canceled).

Claim 18 (currently amended). The preparation of claim 11, wherein the content of one or more flavones, flavanones and/or flavonoids is from 0.1 to 2.0% by weight, based on the total weight of the preparation.

Claim 19 (currently amended). The preparation of claim 18, wherein the one or more flavones, flavanones and/or flavonoids is a flavone glycoside selected from the group consisting of α -glucosylrutin, α -glucosylmyricitrin, α -glucosylisoquercitin and α -glucosylquercitin.

Claim 20 (previously presented). The preparation of claim 19, wherein the flavone glycoside is α -glucosylrutin.
